

Requirement Analysis

Data Flow Diagram & User Stories

Date	30 Jun 2026
Team ID	
Project Name	Food Ordering Behaviour & Customer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	4 Marks

Level 0 — Context Diagram

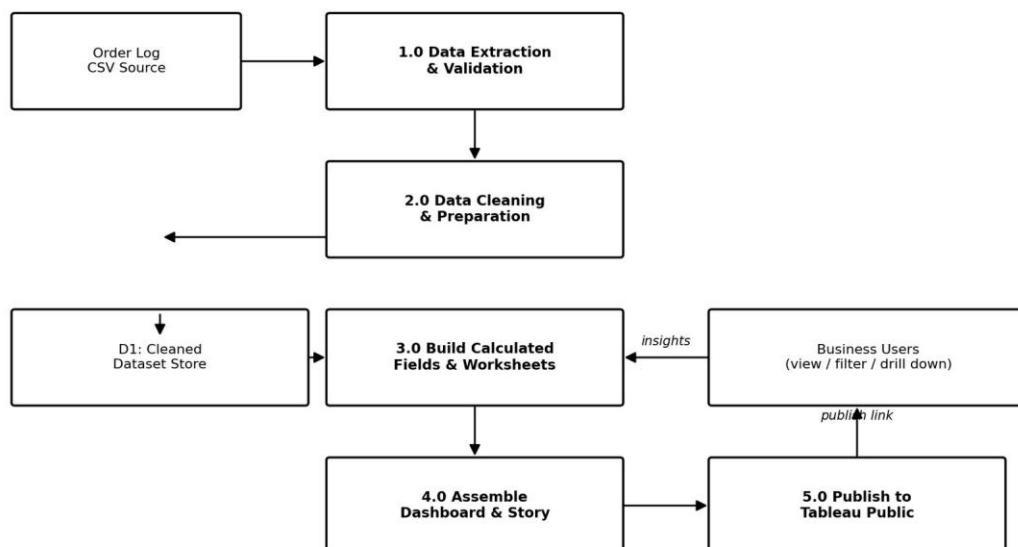

Data Flow Diagram — Level 0 (Context Diagram)

Level 0 — Context Diagram: Raw dataset enters the Tableau Analytics System; stakeholders receive interactive dashboards and stories

Level 1 — Detailed Data Flow

Data Flow Diagram — Level 1

Level 1 — Extraction → Cleaning → Calculated Fields/Worksheets → Dashboard/Story → Publish

User Stories

User Type	Epic	USN	User Story / Task	Acceptance Criteria	Priority	Release
Business Analyst	Data Extraction & Preparation	USN-1	As an analyst, I can extract and validate the 50,000-record order dataset before visualization	Dataset loads with all 19 fields validated, no schema errors	High	Sprint-1
Business Analyst	Data Extraction & Preparation	USN-2	As an analyst, I can view a KPI summary (orders, revenue, average rating) as soon as the dashboard opens	KPI cards display correct aggregate values matching source data	High	Sprint-1
Business Analyst	Dashboard Filtering	USN-3	As an analyst, I can filter the dashboard by city to see regionspecific ordering trends	Selecting a city updates all linked worksheets	High	Sprint-1
Business Analyst	Dashboard Filtering	USN-4	As an analyst, I can filter by cuisine and meal type to compare customer preferences	Charts refresh correctly for the selected combination	Medium	Sprint-2
Restaurant Partner	Segment Analysis	USN-5	As a restaurant partner, I can view order distribution by age group and restaurant segment	Chart shows accurate segmentwise order counts	Medium	Sprint-2
Restaurant Partner	Segment Analysis	USN-6	As a restaurant partner, I can see revenue contribution by meal type to plan menu pricing	Revenue bar chart totals match dataset sum	High	Sprint-2
Restaurant Partner	Rating & Delivery	USN-7	As a restaurant partner, I can review customer rating analysis by meal type to identify service gaps	Average rating per meal type is displayed correctly	Medium	Sprint-3
Business Executive	Behavioural Trends	USN-8	As an executive, I can view how company type (alone/family/friends/partner) affects order patterns	Cross-tab chart of company type vs meal type renders	Medium	Sprint-3
Business Executive	Behavioural Trends	USN-9	As an executive, I can see delivery-time distribution across orders to assess operational efficiency	Histogram of order/delivery time displays correctly	Medium	Sprint-3
Business Executive	Story	USN10	As an executive, I can walk through a narrative story that sequences the dashboard into a guided insight journey	Story navigates across all scenes with correct captions	High	Sprint-4
Radha Krishna Reddy	Publishing	USN11	As team lead, I can publish the Tableau workbook to Tableau Public and verify the shareable public link	Dashboard accessible via Tableau Public URL in any browser	High	Sprint-4
Radha Krishna Reddy	Publishing	USN12	As team lead, I can record end-to-end explanation video and write step-by-step project documentation	Video and documentation submitted before deadline	High	Sprint-4
