

Project Design Phase

Problem – Solution Fit

Date	30 Jun 2026
Team ID	
Project Name	Food Ordering Behaviour & Customer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	2 Marks

Reference Canvas Layout

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) Who is your customer? I.e. working parents of 0-5 y.o. kids	6. CUSTOMER CONSTRAINTS What constraints prevent your customers from taking action or limit their choices of solutions? I.e. spending power, budget, no cash, network connection, available devices.	5. AVAILABLE SOLUTIONS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? I.e. pen and paper is an alternative to digital notetaking.	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one, explore different sides.	9. PROBLEM ROOT CAUSE What is the real reason that this problem exists? What is the back story behind the need to do this job? I.e. customers have to do it because of the change in regulations.	7. BEHAVIOUR What does your customer do to address the problem and get the job done? I.e. directly related: find the right solar panel installer, calculate usage and benefits; Indirectly associated: customers spend free time on volunteering work (I.e. Greenpeace)	
Focus on J&P, tap into BE, understand RC	3. TRIGGERS What triggers customers to act? I.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news.	10. YOUR SOLUTION If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality. If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour.	8. CHANNELS of BEHAVIOUR 8.1 ONLINE What kind of actions do customers take online? Extract online channels from #7 8.2 OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development.	Extract online & offline CH of BE
	4. EMOTIONS: BEFORE / AFTER How do customers feel when they face a problem or a job and afterwards? I.e. loss, insecure > confident, in control - use it in your communication strategy & design.			

Filled Canvas — Food Ordering Behaviour & Customer Trends (Project Deliverable)

Problem - Solution Fit Canvas — Food Ordering Behaviour & Customer Trends

1. CUSTOMER SEGMENTS Urban food-delivery customers (age 18-44) across Mumbai, Pune, Bangalore, Delhi, Chandigarh, Hyderabad; restaurant partners and platform business analysts	2. JOBS-TO-BE-DONE Order food matching mood, hunger level & occasion; get it delivered quickly; for businesses — understand ordering trends to plan menus, offers & staffing	5. AVAILABLE SOLUTIONS Generic sales dashboards showing only revenue; manual spreadsheet reports; no dashboards combine mood/weather/company context with order data
3. TRIGGERS Hunger, mood swings (stressed/celebrating), rainy weather, weekend gatherings with family/friends/partner, discount notifications	7. BEHAVIOUR Order mostly evening/night; weekend orders skew Bryant & Chinese; ~50% use discounts; repeat order rate ~50%; ratings cluster around 3/5	8. CHANNELS OF BEHAVIOUR Online: food delivery app/website Offline: word-of-mouth, restaurant signage, festive/weekend planning with family & friends
4. EMOTIONS (BEFORE / AFTER) Before: hungry, indecisive, unsure of options — After: happy/celebrating (good order) or frustrated/stressed (late delivery, wrong pack)	9. PROBLEM ROOT CAUSE Order and behavioural data (mood, weather, company, hunger) is captured but never consolidated into a single visual analytics layer for decision-making	10. YOUR SOLUTION An interactive Tableau dashboard & story analysing 50,000 orders — KPIs: city/cuisine trends, meal-type revenue, ratings & delivery time — published on Tableau Public

Canvas Reading: The customer segment (urban delivery users + restaurant/analyst stakeholders) is triggered by hunger, mood and weather to seek a meal. Today's available solutions (generic revenue dashboards, manual spreadsheets) fail to connect that trigger to actual behaviour. The root cause behavioural and transactional data existing but never being joined visually is what the proposed Tableau solution (box 10) directly resolves.
