

Project Design Phase

Solution Architecture

Date	30 Jun 2026
Team ID	
Project Name	Food Ordering Behaviour & Customer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	4 Marks

Solution Architecture Diagram — Food Ordering Behaviour & Customer Trends

Layer	Component	Role	Technology
Layer 1	Data Source	The 50,000-record food_ordering_behavior_dataset.csv single source of truth for the analysis	Flat-file CSV (19 columns)
Layer 2	Data Preparation	Cleaning, type casting and creation of derived fields (age group, revenue, repeat-order flag) for consistency	Tableau Data Prep / Excel
Layer 3	Tableau Data Engine	Cleaned data loaded into Hyper Extract (.hyper) — keeps dashboard responsive at full data volume	Tableau Hyper Extract (.hyper)
Layer 4	Calculated Fields & Worksheets	9 worksheets built on extract: KPI table, city, cuisine, meal-type revenue, rating, delivery time, age/segment, company/meal-type	Tableau Desktop — Calc Fields, LODs
Layer 5	Dashboard & Story	Worksheets assembled into one interactive Dashboard; sequenced into a Story for narrative presentation	Tableau Dashboard + Tableau Story
Layer 6	Tableau Public	Finished workbook published here — End Users get browser-based, view-only access without Tableau installed	Tableau Public (Salesforce CDN)
