

Ideation Phase

Brainstorm & Idea Prioritization

Date	30 Jun 2026
Team ID	
Project Name	Food Ordering Behaviour & Customer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	4 Marks

Step-1: Team Gathering & Problem Statement Selection

Step 1: Team Gathering & Selecting the Problem Statement

PS-1: Customers can't get context-aware food recommendations (mood/weather/company)	PS-2: Businesses lack a consolidated view of ordering behaviour across cities & segments	SELECTED: Build a Tableau analytics dashboard & story to solve both PS-1 and PS-2 using the order dataset
---	--	---

The team selected the combined problem building a Tableau analytics solution addressing customer personalisation gap and business visibility gap simultaneously as the guiding problem to solve.

Step-2: Brainstorm Idea Listing and Grouping

Step 2: Brainstorm — Idea Listing & Grouping

Visualization Ideas	Behavioural Insight Ideas	Delivery & Ops Ideas
KPI summary cards (orders, revenue, rating)	Mood & weather impact on order value	Delivery/prep time distribution
City-wise order volume map	Company-type vs meal-type analysis	Rating analysis by meal type
Cuisine preference breakdown	Repeat-order & discount usage trends	Story sequencing for stakeholder narrative

Ideas were listed freely and grouped into three themes Visualization Ideas, Behavioural Insight Ideas, and Delivery & Ops Ideas mirroring the three analytical angles of the dataset.

Step-3: Idea Prioritization (Impact vs Effort Matrix)

Each idea was plotted on an Impact vs Effort matrix. High-impact, low-to-medium-effort ideas the KPI dashboard, cuisine/city breakdown, and meal-type revenue & rating charts were prioritised for this release.

Idea Prioritization Summary Table

Idea	Theme	Impact	Effort	Priority
KPI Summary Dashboard (Orders, Revenue, Avg Rating)	Visualization	High	Low	1st
Cuisine & City Breakdown Charts	Visualization	High	Low	2nd
Meal-Type Revenue & Rating Analysis	Behavioural	High	Low	3rd
Delivery Time Distribution Histogram	Delivery & Ops	High	Med	4th
Age Group & Restaurant Segment Analysis	Behavioural	Med	Low	5th
Company Type × Meal Type Cross-Tab	Behavioural	Med	Low	6th
City vs Cuisine Heatmap	Visualization	Med	Med	7th
Tableau Story Narrative (5-scene)	Visualization	High	Med	8th

Selected Solution: An interactive Tableau dashboard and story built on a 50,000-record food ordering dataset, covering KPIs, city-wise order volume, cuisine preferences, meal-type revenue, rating analysis and delivery-time distribution published to Tableau Public.
