Problem Statements — Food Ordering Behaviour Project

Two problem statements were defined one from the end customer's point of view and one from the business/restaurant-partner point of view since the dataset captures both perspectives.

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a customer using a food ordering & delivery app	get a meal that matches my mood, hunger level and occasion	the app shows the same generic menu regardless of city, weather, or who I'm ordering with	ordering platforms don't personalise recommendations using behavioural context (mood, weather, company type)	frustrated and less confident that I'm choosing the right restaurant or cuisine
PS-2	a restaurant partner / platform business analyst	understand ordering patterns across cities, age groups and meal times	order, rating and behavioural data is scattered across raw logs	there is no consolidated visual analytics view connecting these factors to order value and satisfaction	unable to plan staffing, offers and inventory effectively for each city and meal time
PS-1 Drives → Behavioural worksheets: mood-driven ordering, weather-linked views, company type analysis			PS-2 Drives → Geographic & operational worksheets: city order volume, meal-type revenue, delivery time distribution		

I am	Describe customer with 3-4 key characteristics - <i>who are they?</i>	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - <i>what are they trying to achieve?</i>	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - <i>what bothers them most?</i>	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - <i>what needs to be solved?</i>	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - <i>how does it impact them emotionally?</i>	Describe the emotions the result from experiencing the problems or barriers
